Dynamic Stream

Canonical name	DynamicStream
Date of creation	2013-03-22 15:31:34
Last modified on	2013-03-22 15:31:34
Owner	zshao (11001)
Last modified by	zshao (11001)
Numerical id	4
Author	zshao (11001)
Entry type	Definition
Classification	msc 68-00
Related topic	Information

A dynamic stream can represent an information flow — a sequence of messages encoded by the sender and communicated using a transmission channel possibly distorted with noise, to a receiver whose goal is to reconstruct the sender's messages and interpret message semantics. — From: "SHANNON, C. E. 1948. A mathematical theory of communication. Bell Syst. Tech. J. 27, 379–423, 623–656."
